ABOUT THE COMPANY

COMPANY VISION

KONDJENI NKANDI ARCHITECT INC'S VISION IS THE EVOLUTION OF ARCHITECTURE HOLISTICALLY, TO ENDEAVOUR, EXPLORE, CREATE AND INNOVATE THROUGH ARCHITECTURE. CRAFTING OF UNIQUE SPACES AN "ARCHITECTURAL RESPONSE".

COMPANY DESIGN PHILOSOPHY

Kondjeni Nkandi Architect Inc's design philosophy is to create architecture that not only reflects the current times and culture, but also shapes the future of the Namibian context and beyond our borders. We believe that the most successful approach is crafted through innovative thinking and collaborative processes with clients, and that begins with a holistic approach of trying to solve some of the social and economical problems in the Namibian context through architecture.

Through architecture we are trying to provide clear measurable values to clients in every sector by recognising that every project demands a unique, tailored response.

Our team believes that a building is the formulation and expression of the surrounding community,

nature and environment. It needs to tell a story - its own tale - and enhance sustainability, but never overpower its purpose or that of the people that occupy it. A building is the autobiography of an architect, but the architect has to nurture the subconscious surroundings within it.

SUSTAINABLE ARCHITECTURE

Planet Earth is our biggest client, and it has become the duty of each architect to care for and listen to planet Earth as it is our duty to secure it for generations of clients and architects to come. Peace.

COMPANY MISSION STATEMENT

The company's mission statement is to become a professional and empowerment success, committed and striving to move with the times by continuously adapting to contemporary methods of design, technology and the diverse nature of the building industry, leading to the development of its own brand – KNA. Through close engagement with its diverse clientele, KNA aspires to create great public architecture that takes nature into account, unifying people from different cultural spheres with the environment. Our mission is to provide clients with effective services for all types of building from inception to completion.

PROJECT SERVICES

The company specialises in a wide spectrum of architectural

services. The team has vast experience and has worked in different parts of Southern Africa, therefore understanding the regional context. We specialise in residential, institutional, commercial, recreational and industrial buildings and structures.

SERVICES OFFERED

Kondjeni Nkandi Architect Inc offers the following services:

- Architectural design
- Technical documentation
- Contract administration
- Feasibility studies
- Special studies and investigations
- Master planning
- Local authority approvals
- 3D investigative design

Professional services and advice are always available for both existing and newly proposed structures. Professional fees are charged in accordance with the minimum scale of fees as gazetted in the Architects and Quantity Surveyor's Act of 1979.

COMPUTER AIDED DESIGN SYSTEMS

The company is fully proficient in the following computer aided design systems:

- ArchiCAD 19 & 20 for design, municipal submissions and technical documentation. The program has 3D modeling capabilities.

- Artlantis Studio for professional rendering and photorealistic lifelike 3D imaging
- Twinmotion for 3D animations
- Caddie & AutoCAD which are 2D draughting systems compatible with the local CAD environments used by other professionals working in conjunction with the firm
- Photoshop for advanced presentation of work and projects
- Microsoft Office
- MS Project
- Accounting software 'Pastel'
- Macintosh program systems

OFFICE STRUCTURE, RESOURCES AND EQUIPMENT

The office is situated at Kupferbeg Street, no 12 Erosark and consists of the following:

- Administrative department housing the reception, welcoming area and accounts
- Open plan studio or architectural department housing 9 staff
- State-of-the-art boardroom facilities
- Fully fledged architectural library for research
- Director's office
- And other support services

Kondjeni Nkandi Architect Inc has the following equipment:

- 1 x A0 plotter
- 1 x Ricoh, A3 printer
- 4 x HP, A4 printers
- 16 x Mac Pro computers
- 1 x Windows PC rendering machine
- 1 x Toyota D4D Legend 45 bakkie
- 1 x Opel utility bakkie
- Fully fledged telephone systems
- Internet, server and backup facilities

COMPANY STAFF

The architectural and administrative staff at Kondjeni Nkandi Architect Inc comprises of registered architects, architects in training, accountants, draughtspersons, office personnel, support field and students. We pride ourselves on being highly skilled, competent, large enough to handle complex projects with efficiency and small enough to give clients detailed attention and good service.

ABOUT KONDJENI NKANDI

KONDJENI NKANDI: DIRECTOR & OWNER

Kondjeni Nkandi is a 100% shareholder in Kondjeni Nkandi Architect Inc, as well as Company Director. She graduated in 2001 from the University of Port Elizabeth (now NMMU) in South Africa, with a Bachelor of Architecture (B Arch) and a Bachelor of Building Arts.

In 2002, she took up employment with Erhard Roxin Architects in Swakopmund, working as an Architect in Training until August 2004. She then started working at Marley Tjitjo Architect Inc in Windhoek, where she continued her training until she registered as a professional architect in 2005.

She is registered with the Namibia Institute of Architects (NIA) and the Namibian Council for Architects and Quantity Surveyors (NCAQS) (NIA reg no: 265, NCAQS reg no: 411).

OUR WORK

17

page

Project Name

**CONSTRUCTION OF THE //KHARAS
REGIONAL COUNCIL OFFICE PARK**

Client

//KHARAS REGIONAL COUNCIL

Location

KEETMANSHOOP, NAMIBIA

Project Cost

N\$134 MILLION

A new building is not just a container to live and work in but rather the product of specific circumstances ranging from function or location to costs and trends. It celebrates civic identity and creates spaces where locals can interact as civil equals. The new //Kharas Regional Council offices were built on a need for sustainability and a maintenance-free building that celebrates development within the //Kharas Region.

The main concept is an axis that forms the entrance into a multi-volume foyer, which acts as the main point of transition to various spaces, such as the council chamber, community hall and office spaces. Materials were restricted to off-shutter concrete, face brick and glass, resulting in a delightful environment which is at once richly varied and quietly harmonious. Furthermore, simple and practical methods have been applied to minimise the energy requirements of the building. Large office windows are deeply recessed

and protected from direct sunlight by steel louvres. The orientation of the building is such that the long facades face north/south, with minimal fenestration on the eastern and western facades. The landscaping is designed using gabion walls from the excavated rocks and is populated with mostly indigenous plants that have low water requirements.

Project Name

**EXTENSION OF THE ADMINISTRATION
BUILDING AT THE UNIVERSITY OF
NAMIBIA MAIN CAMPUS**

Client

UNIVERSITY OF NAMIBIA

Location

WINDHOEK, NAMIBIA

Project Cost

N\$343 MILLION

In more recent years, the University of Namibia has experienced an unprecedented and exponential growth in student numbers. This called for long-term planning and investments in teaching and administrative infrastructure for the institution. The proposed administration building was to integrate the existing administration and blend into the existing university fabric, guided by the desire to reduce maintenance of the building while at the same time creating a dialogue with the surrounding vegetation.

The structure is to house all administrative departments to the university as well as integrate other auxiliary services that will help embolden futuristic plans of the institution and provide better facilities for the present 12 campuses. The scope includes the construction of three building blocks that are linked together, as well as linking the existing administration block, which will be renovated under the same scope.

The design is to offer an ultra modern facility with low

maintenance building materials to ease maintenance costs for the client. The structure is a fusion of face-brick clad as well as off-shutter concrete wall surfaces integrated with glass and steel structures, still respecting the site conditions and architecture. The design is intended to bring together the staff and the students through open spaces and pause areas. This idea also inspired the landscaping, which is guided by seating spaces and wide pathways for interaction while in transit.

Project Name

**CONSTRUCTION OF THE ZAMBEZI
REGIONAL EDUCATION OFFICES**

Client

MINISTRY OF EDUCATION

Location

KATIMA MULILO, NAMIBIA

Project Cost

N\$105 MILLION

The Zambezi Regional Education office came as a result of the Regional Education Directorate's need for their own office complex. Currently, the different departments are scattered in different buildings around Katima Mulilo, and, as their staff component has grown over the years, there is not sufficient space to house them. Education is one of the keys to a strong developed nation. The Zambezi Regional

Education Offices is the backbone of educational matters in the Zambezi Region, catering for more than 120 schools in the region. It is therefore essential to develop infrastructures that will assist in meeting the targets set for Vision 2030, one of which is quality education for all.

The proposed design concept was arrived at through detailed investigations and consultations between the client and our professional team. We paid particular attention to aspects that were considered of great importance to the success of the project. Aspects that influenced the brief and scope of the project included site requirements and limitations, since the design was within an office park; client brief requirements; the current and future proposed staff structure; optimum general space for use; a positive and progressive image of the proposed building; and, last but not least, reducing maintenance costs through choice of materials and passive ways of cooling and using natural light for the building, thus reducing energy consumption.

Project Name

**FEASIBILITY STUDY FOR THE NEW
NAMIBIAN PORTS AUTHORITY
CORPORATE HEAD OFFICES**

Client

NAMIBIAN PORTS AUTHORITY

Location

WALVIS BAY, NAMIBIA

Project Cost

N\$200 MILLION

The corporate head office for this prominent state-owned enterprise came as a result of growing demands for more office space with the exponential growth of staff numbers within the Namibian Ports Authority. The main focus of the design

was to reinforce and enhance the client's corporate identity while integrating the three main functions of the building, which are the multi-purpose convention centre, corporate offices and commercial and recreational component, at the

same retaining spatial privacy and inter relationships within these spaces. Materials were selected for durability, low maintenance and their ability to withstand the harsh weather conditions of the coastal town of Walvis Bay.

CORPORATE SOCIAL RESPONSIBILITY

Kondjeni Nkandi Architect Inc has a set policy to promote previously disadvantaged individuals and communities, which we have done unceasingly and endeavour to continue in good faith to assist where possible. Below are some of the corporate social responsibility programs that are in place at Kondjeni Nkandi Architect Inc.

As part of our commitment to the community, Kondjeni Nkandi Architect Inc donates throughout the year to various school and organisations (listed below). Our investment in these communities and individuals demonstrates an innovative move to positively impact communities where we live and work. In addition to the schools below are various individuals that we have helped through our bursary fund. Our aim is to improve the livelihood of the learner so as to give them a better future. We believe in the old adage, 'It takes a community to raise a child'.
